

Prismberry Technologies

Flexible IT staff augmentation
and rapid team scaling
solutions

Introduction

Prismberry empowers businesses to scale engineering capacity by providing vetted IT professionals across development, QA, and infrastructure domains.

Our model focuses on *speed*, *quality*, and *cost-efficiency*, enabling teams to deliver projects faster while maintaining high standards.

01

Service Overview

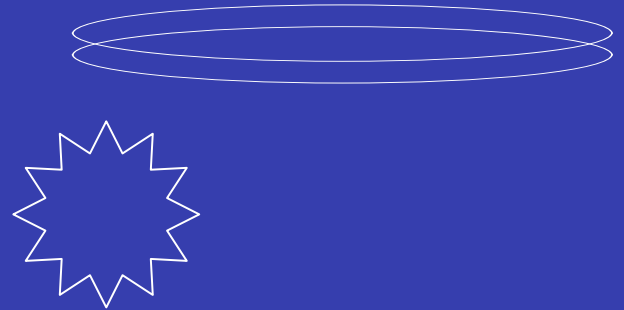

Company Snapshot

Prismberry is an India-based staff augmentation firm supplying developers, engineers, and specialists to global clients.

With emphasis on **quick onboarding** and domain expertise, Prismberry reduces hiring time and boosts project velocity.

Core Offerings

- We provide **flexible hiring models** including dedicated teams, contract-to-hire, and short-term engagements.
- Services span full-stack development, DevOps, QA, and specialized technical consulting to support varied project needs.

02

Engagement Models

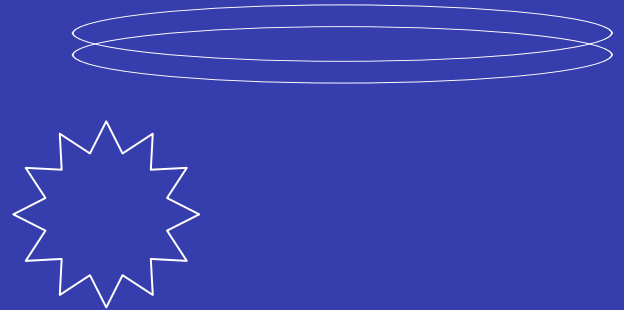

Hiring Models

We offer *dedicated teams*, *contract-to-hire*, and *short-term engagements* to match project lifecycle and budget.

Each model includes flexible ramp-up and clear contractual terms for transparency.

Onboarding Process

- Our onboarding combines role-specific vetting, knowledge transfer, and tooling access within days.
- A structured *kickoff* and continuous mentoring ensure immediate productivity.

Quality Assurance

Quality is enforced through code reviews, automated testing, and periodic performance checkpoints.

We track KPIs and deliverables to maintain **consistent standards** across engagements.

Conclusions

- Prismberry delivers scalable engineering capacity with rapid onboarding and robust QA practices.
- Engagement flexibility and domain expertise enable faster project delivery and measurable operational improvements.
